Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Raymond et al. (US Patent No. 5,775,331).

Regarding claim 1, Raymond et al. discloses a method for tissue-selective treatment in therapy and surgery comprising the steps of:

- ❖ positioning a probe in the area of the diseased change after placing on the body organ or body tissue to be treated (Column 5, lines 22-24);
- ❖ activating tissue selection in that different electrical and/or electromagnetic stimulus signals which can be preadjusted or modulated are sent to the tissue in order to stimulate the latter (Column 5, lines 25-29);
- ❖ distinguishing the healthy tissue parts from the pathologically changed tissue parts by evaluating the responses to these stimuli; wherein, in the case of an expected stimulus response identifying healthy tissue, repositioning the probe and activating the tissue selection again, or when

the stimulus response identifying pathologically altered tissue is absent or unexpected, carrying out the corresponding therapeutic or surgical treatment by the same probe at the selected site (Column 5, line 8 – Column 6, line 60).

In regards to claim 2, Raymond et al. discloses a method for tissue-selective treatment according to claim 1, in which the tissue selection during the repositioning of the probe due to an expected stimulus response identifying healthy tissue can be carried out by iterative or continuous transmission of stimulus signals (Column 6, lines 7-21).

With regard to claim 3, Raymond et al discloses a method for tissue-selective treatment according to claim 1, wherein a direct online tissue selection is carried out by alternating treatment and positioning with tissue selection and immediate evaluation of the stimulus responses and the user is warned during treatment of critical tissue regions and/or the therapy can be interrupted (Column 5, line 52 – Column 6, line 6).

Response to Arguments

Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anuradha Roy whose telephone number is (571) 272-6169 and whose email address is anuradha.roy@uspto.gov. The examiner can
